

AGRICULTURAL SCIENCE AWARD

ENTRY FORM

The aim of this award is to recognise a Waikato Scientist or Science Team whose research efforts have culminated into a novel tool, process, technology or scientific breakthrough that will have (or has had) a positive impact on farm profitability, animal health and welfare, or farming sustainability in the Waikato region.

Criteria

- The Scientist or Science Team must have been based principally in the Waikato region (defined as the area in and around the Waikato river catchment).
- The research put forward could be conducted anywhere in the world and must be of demonstratable value to the New Zealand Agricultural Sector.
- Scientific achievement is judged by international standards by a group of peers, based on science publications, patents or other forms of objective recognition.
- The ability of the Scientist or Science Team to communicate their research to a wide (lay) audience.
- The cash award must be spent in such a way to further advance science in the Waikato (e.g. paying to bring in an overseas expert, attending an international conference, visiting overseas research organisations, upskilling in a certain area, etc.) and winners must provide a letter to the Trust within 12 months of receipt of the award, detailing how the award was used.
- The award will be paid to the individual or split equally between members of the team unless otherwise agreed between the winner and the Hamilton Science Awards Trust.

Eligibility

- The nominee or team must have performed or directed the work describe and it must have been performed in the last five years.
- The nominee or team must have recognised qualifications relative to the award being sought. A relevant science qualification is required.
- The recipient(s) must agree to give a nominated lecture or presentation to a high school or general audience if requested.
- The recipient(s) must be prepared to interact with appropriate news media to publicise the research on which the award is based and science in general.
- The winner(s) does not have to be a New Zealand citizen or resident.
- While previous years' outright winners in this award category are encouraged to reapply, they can not put forward the same piece of work in support of this year's award.
- Previous runners-up in this award category are encouraged to reapply and may re-submit a piece of work already submitted for consideration in past years.

The nominee or team can be self-nominated or nominated by another party familiar with the scientist's work. If the scientist or team is nominated by another party, that party must be confident all eligibility criteria can be met, including the nominee's or team's willingness to be available for public and media interaction as above.

**APPLICATION DUE BY 5PM,
SATURDAY 1ST JULY**

from LAB to LIMELIGHT 2017
